

Task 2:- Switch Interface

2_btn_led.ino

```
1  #define MAINLED 2
2  #define BTNPIN 23
3
4  void setup() {
5      Serial.begin(115200);
6      pinMode(MAINLED, OUTPUT);
7      pinMode(BTNPIN, INPUT_PULLUP); // or INPUT_PULLUP if using pull-up wiring
8  }
9
10 void loop() {
11     int state = digitalRead(BTNPIN);
12
13     if (state == LOW) {
14         Serial.println("LED HIGH");
15         digitalWrite(MAINLED, HIGH);
16     } else {
17         Serial.println("LED LOW");
18         digitalWrite(MAINLED, LOW);
19     }
20 }
21
```
